Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 February 2007.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection.

Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 08 February 2007 has been entered.

Response to Amendment

The Applicant amended independent claim 23. Claims 1, 3, 5, 8-22, and 24 are canceled. All pending claims (2, 4, 6, 7, 23, 25, and 26) were examined in this non-final office action.

Response to Arguments

Applicant's arguments, see Remarks, filed 08 February 2007, with respect to the rejection(s) of claim(s) 2, 4, 6, 7, 23, 25, and 26 under 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of JunglePort. The Applicant's arguments are moot. The prior art previously relied upon is withdrawn.

The Applicant is reminded that twice-rejected claims are eligible for appeal.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 1. Claims 2, 4, 23, 25, and 26 are rejected under 35 USC 103(a) as being unpatentable over JunglePort (a collection of prior art describing JunglePort services cited in PTO-892, Items: U-W).**

JunglePort teaches the JunglePort web site service providing Palm mobile device users with access to content via their personal computers (U: see page 1; V: see page 1). JunglePort further teaches:

- accessing the information items at an on-line directory website, including providing the computer with a browser for navigating the Internet in order to use the website, using the computer to search a database at the website for a set of information items based on a search request from the user, displaying information items from the website on the computer, wherein the website provides on-line yellow pages directory listings, and the information items are part of those listings, and selecting additional information associated with one or more of the directory listings to accompany the directory listings wherein the directory listings include a business name, and wherein the additional information comprises one or*

more of driving directions, maps, advertisement, menu, coupons and a list of items for sale at the business;
placing the information items in an information shopping cart at the website in response to selection of the information items by the user;
transmitting the information shopping cart having the selected information items from the website to the portable device when the portable device has direct communications link to the computer at the first location;

The following teachings address the claim elements listed above:

JunglePort teaches providing Palm users with downloadable, customized city guides (i.e. Safaris) containing restaurant information, Yellow Pages listings, and vector-based maps for 39 US cities (U: see page 1).

JunglePort serves as the control center where users can select a specific geographical area, tune the JunglePort map to include a neighborhood, then add personalized restaurant content and Yellow Pages content based on cuisine and category choices. User preferences and settings are stored on the JunglePort server for future reference. Once content has been selected, the Safari is then downloaded to the handheld device (U: see page 2). JunglePort further teaches the user creating personalized JunglePort Safaris- or guides- at the desktop portal, and then downloading them (i.e. Safaris) to the Palm device (V: see page 2). Please note: the Palm device is directly connected to the user's computer via wired or wireless connection to perform synchronization.

- using the portable device to access the selected information items at the portable device when the portable device is at one of the second, remote locations away from the computer and without access to the directory website; as noted above, a Palm device is a mobile handheld computer usable in locations remote from the user's desktop computer. JunglePort content downloaded into the Palm is usable when disconnected from the user's desktop computer (U: see pages 1 and 2).
- and automatically placing branding information in the information shopping cart with the information items so that the branding information is displayed at the portable device with the information items, an advertiser's marketing message is extended to mobile device users via the advertiser's banner (i.e. branding information) ad that appears on the user's mobile device (W: see page 2).

JunglePort teaches all the above as noted under the 103(a) rejection and teaches automatically placing branding information in the user's Safari(s) (i.e. information shopping cart). Although JunglePort does not disclose wherein the branding information identifies the operator of the directory website, it would have been obvious to one of ordinary skill in the art at time the invention was made to include at least the JunglePort logo, JunglePort website address, or other branding information in order for JunglePort itself to receive a similar marketing benefit it provides to its own advertisers.

- 2. Claim 6 is rejected under 35 USC 103(a) as being unpatentable over JunglePort (a collection of prior art describing JunglePort services cited in PTO-892, Items: U-W) in view of Official Notice (regarding notoriously old and well-known in the arts)**

JunglePort teaches all the above as noted under the 103(a) rejection and teaches creating an information shopping cart (i.e. a Safari) to store content and Yellow Pages listings, but does not disclose the user naming their Safari. The Examiner takes the position that it was notoriously old and well-known in the arts at time the invention was made for computer users to be able to name a file or a folder containing data, content, or other information in order to provide user friendly or user recognizable content folder as a convenience. For example, Mac OS or Windows environments allowed users to name content folders. Therefore it would have been obvious to one of ordinary skill in the art at time the invention was made to modify the method of JunglePort to allow users to name their content folders as taught by Official Notice, in order to provide a user convenience when using their Safari.

- 3. Claim 7 is rejected under 35 USC 103(a) as being unpatentable over JunglePort (a collection of prior art describing JunglePort services cited in PTO-892, Items: U-W) in view of Beard (PTO-892, Item: X).**

JunglePort teaches all the above as noted under the 103(a) rejection and teaches i) consumers using their Palm mobile devices to access content

transferred from the JunglePort web site into the Palm mobile device, and ii) the downloaded Safari(s) being usable by the Palm device, but does not disclose a file format selected by the user. On the other hand, Beard teaches 24 uses of the Palm device and further teaches converting Word, WordPerfect, Excel, Lotus 1-2-3, text, and various MacIntosh formats for the Palm device (X: see at least pages 1 and 2). Therefore it would have been obvious to one of ordinary skill in the art at time the invention was made to modify the method of JunglePort to convert user selected formats for the Palm device as taught by Beard, in order to accommodate a variety of applications, and thereby increase the utility of the Palm device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 6,385,591 (Mankoff) 07 May 2002; teaches a system and method for organizing electronic coupons retrieved from a web site via a user's personal computer and transferring to user's PDA using synchronizing means.
